

nero 9

Nero Volume Licensing Program

**The digital world for businesses, governmental organizations,
and educational institutions**

Nero 9, the latest version of the world-renowned digital multimedia suite, brings you all the features that your organization needs to get ahead in the digital world. With Nero 9, you can edit and burn data, compress or convert digital files, as well as plan and execute backups for all digital data or multimedia content like music, photos, and videos.

Reliable Business Solutions

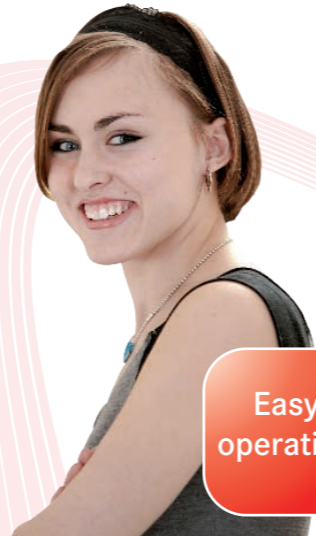

Save money

David, 46, CEO
Enjoys the efficiency of the Nero Volume Licensing Program

The Nero Volume Licensing Program is the ideal digital media solution for our company. Not only do we get a great discount when we order multiple licenses, but working with Nero is so easy. It's a well-known brand with a user-friendly interface, and my employees don't need training courses to use Nero proficiently. From a managerial point of view, I highly recommend the Nero Volume Licensing Program.

Easy operation

Sophie, 19, office intern
Uses Nero at home and at work

I burn data to DVD for my boss pretty often so he can work on important documents when he's on the road. I learned how to use Nero a long time ago because my parents had it on our PC at home, so it actually turned out to be another useful skill I was able to bring to the company early on. It's something that makes my boss' job a bit easier and I didn't need any additional training!

Flexible video editing

Stephanie, 27, account executive
Creates and edits video presentations on the go with Nero

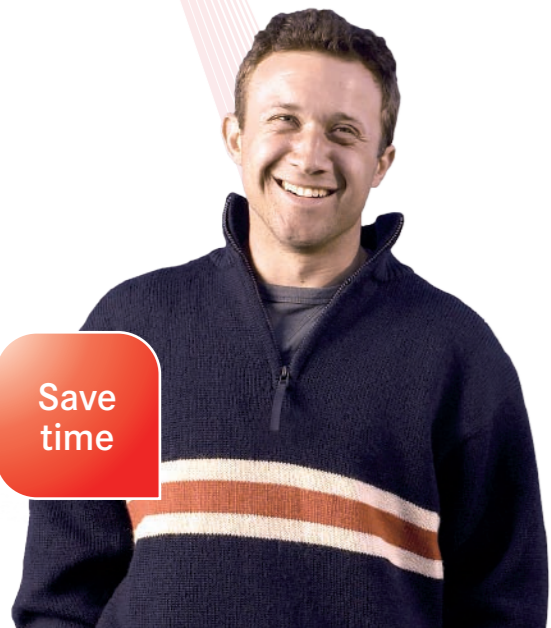

In my job, I'm always on the road and have to be flexible in how I demonstrate my company's products to potential customers, so I often rely on video presentations. The variety of features and tools in the Nero suite has always been so helpful. There have been times that I have had to convert a film into another format or system, or even cut out certain parts on short notice. With Nero I can work on my video presentations wherever and whenever I want.

Increased data security

Christian, 52, manager of a woodworking studio
Secures data quickly and easily with Nero

We make individual sketches of pieces for lots of customers who need them for special projects like fairs and exhibitions. Customers often request additional pieces, or even replacements for pieces, and if the blueprints aren't available, the entire project can fall apart. So I need a backup solution I can rely on to regularly secure my data. Nero offers our small company all the data protection I need at a fair price, so I can stay focused on my work.

Save time

Paul, 36, IT administrator
Saves time on installation and maintenance with Nero

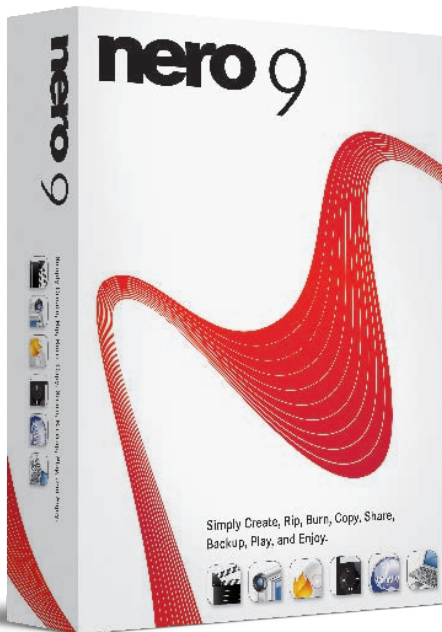

Since our company became part of the Nero Volume Licensing Program, I have been able to save quite a bit of time. Installing one license key on several computers is less time consuming than installing licenses at each individual work station, yet individual burning rights can be administered to each coworker quite easily. Purchasing additional licenses is always simple with Nero, so I can stay flexible when planning for the future.

Easy audio editing

Marc, 23, event manager
Keeps the party going with Nero

I had to set up a small office party for a well-known company. One of my responsibilities was the music. Since the budget was rather small, I couldn't hire a DJ or a band, so I chose some great party songs and mixed them using Nero. The suite offers lots of features for editing and compiling songs. Needless to say, the party was a big hit and I even got another contract.

Flexible,
efficient,
and
affordable
