

COMPANY PROFILE

brings together innovations and quality

OUR COMPANY

Our company imports and distributes some of the most popular brand names in technology. We are aware that technology is one of the most progressive sectors in the world which is why we tend to stimulate quality and innovations. We are proud to represent companies that offer high quality and innovative products. Our business partners like Netgear, LaCie, Sitecom, Avid Pinnacle, Sony Creative Software, Snom, etc., are distinguished with efficiency, rich experience, support to business partners and the use of up-to-date operation methods. We collaborate with computer specialists with high knowledge in information science, which is why we can meet the needs of the most demanding users as well as home users. Our customers'

needs have been our concern since 1991 and we will maintain this mind-set in Slovenian computer environment.

The cornerstone of our service activities is a young and dynamic team, in a stimulating environment, achieving the set objectives. Much attention is devoted to educating people in the sales network and quality technical support and service, services which are admired by our end users. We distinguish ourselves by »exibility, responsiveness, rapid implementation of advanced sales tools and a reliable supply of goods by the chain in Slovenia and Europe. Our greatest competitive advantage is our experience and knowledge of the legality of the local market, which include the wider region.

MISSION, VISION & STRATEGIC OBJECTIVES

Mission

With services, based on the latest trends in logistics and are supported with the latest information technology, we enable partner's rapid development and significant competitive advantage. To our colleagues we offer a stimulating environment for personal and professional development.

Vision

With the level of service to become the leading distributor in the region, whose performance is the best business practices

in logistics and distribution for many enterprises in the region.

Strategic objectives

- To become a leading distribution company in the region in IT field
- Stable growth of the company's value
- Building and maintaining long-term business relationships with partners
- Implementation of short-term corporate goals

DOMEX TOWARDS GROWTH DESPITE THE GLOBAL RECESSION

Global economic & IT prosperity lead the way, as our company witnessed exponential 215% growth in 2006 and 15% growth in the following year. After the financial crisis and global economy recession of 2008 and especially 2009, DOMEX gradually bounced back in 2010 with 5% growth. As the IT industry performs better due to hardware spending on storage, mobile devices and network equipment, in 2011 we expect a double-digit growth.

Rok Hudoklin, DOMEX CEO

OUR BRANDS

NETGEAR® Connect with Innovation™ NETGEAR is a global networking company that delivers innovative products to consumers, businesses and service providers. For consumers, the company makes high performance, dependable and easy home networking, storage and digital media products to connect people with the Internet and their content and devices. For businesses, NETGEAR provides networking, storage and security solutions without the cost and complexity of Big IT.

DVD production and Blu-ray Disc™ authoring. Sound Forge™ Pro, ACID™ Pro, and Vegas™ Pro software have defined digital content creation for a generation of creative professionals. These signature product lines continue to advance media production by providing powerful, accessible tools.

Orkio, the brand, was established and registered in 2006 as a high quality brand of original fashion bags for mobile electronics. This was based on the

observation that there was a real lack in choice for consumers of European style fashion cases, and evidence that most cases are generic, super large volume, medium to low quality items, where design is limited to a colour and graphic choice, on a standard case. The product range is now wide and varied with cases for mobile phones, digital cameras, smartphones, DSLR cameras and laptops (laptop cases, sleeves, backpacks, briefcases, EPC cases) as well as multi cases.

Nero, the creator of liquid media technology, enables liquid content creation and distribution anytime,

anywhere, and on any device. The company provides consumers with the freedom to simply enjoy their music, photos, and videos, regardless of hardware or file format, by taking a unique platform neutral, standards-based approach to solution development.

Made for ideas.

LaCie combines design and technology to result in products that are both beautiful and performance-driven. LaCie works hard to make your digital life better. Over

the past 10 years, they have consistently been first-to-market with such innovations as the first USB/FireWire board, SCSI drive, USB bus-powered hard drive, SATA external drive, FireWire 800 hard drive and 1TB hard drive. Recognizing the current trends, LaCie will continue to develop network- and multimedia-centric products, while still creating everything from massive multi-terabyte systems to miniscule USB keys.

snom technology AG develops and manufactures Voice-over-IP (VoIP) telephones based on open standard for

enterprise communications. The devices are suitable for use in all business environments ranging from home offices to small- and medium-sized enterprises and large corporations.

Sitecom is one of the leading and fastest growing computer network brands for home and small business use. The Sitecom brand has a clear mission statement: "make it easy". Sitecom makes it easy to set up a home network and to expand it, since it converts technical products into user-friendly solutions which can be used immediately without any problems.

From the most prestigious, award-winning productions to music and movies made at home, Avid creates the technology that people use to make the most listened to, most watched and most loved media in the world.

The PCTV Systems brand stands for high quality and innovative products in the TV Viewing and Digital home marketplace. The portfolio covers external (USB) and internal (PCI) TV tuner products for analog

and digital TV reception on PC and MAC. One major goal for the company is to develop well designed hardware and software solutions which enable customers to use the products without a deep knowledge of technologies.

Hauppauge Computer Works has been bringing TV to the PC since 1992. The Company is the worldwide leader in

developing and manufacturing PC based TV tuners and data broadcast receiver products. Hauppauge's products allow PC users to watch television on their PC screens, videoconference and create both still video images and digital TV recordings. Hauppauge's flagship product, the WinTV, is the leading branded TV tuner card for PCs.

Sony Creative Software inspires artistic expression with its award-winning line of products for digital video, audio, and music production, as well as industry-leading technology for
